# Services and Specializations

Logiks Solutions offers a range of services centered around SAP Business One, including:

- Logistics and supply chain management add-ons
- Warehouse Management Suite
- Automation services
- eCommerce integrations
- Shipping integrations
- Barcode scanning solutions

These solutions aim to streamline logistics and production workloads, providing SMEs with efficient and scalable tools to enhance their operations.

## Partnerships and Initiatives

In a recent collaboration, Logiks Solutions partnered with SPHINX IT.RO, a company with over a decade of experience in SAP-powered business transformation. This partnership enables SPHINX IT's clients to access Logiks' Warehouse Management System (WMS) tailored for SAP Business One, furthering the goal of delivering end-to-end solutions for SMEs.

## Online Presence

Logiks Solutions maintains an active online presence, sharing insights and updates through their LinkedIn page and YouTube channel. Their content focuses on supply chain strategies, warehouse automation, and the integration of AI in logistics.

## Product 1: Warehouse Management Suite (WMS)

### What are benefits of choosing Warehouse Management Suite (WMS) and why should you choose it?

- Ready on the go: Intuitive and easy-to-use interface, no comprehensive training needed
- Quick and Seamless Integration: Developed as an add-on to be easily integrated with SAP Business One
- Free Trial: First license on a single device is free. Try before you buy
- Works on Any Device: Works with Android or iOS devices, as well as industry scanners
- Cloud-Based: Centralized cloud management ensures versatility and accessibility
- Scalable: Designed for use by one to hundreds of scanners simultaneously
- Supports all Media: Barcode, QR code, or RFID – our solution supports all relevant media
- Lightning Fast: Dynamic caching enables Logiks WMS to be snappy, avoiding long processing time
- Efficient: Reduces the number of needed scanner devices by about 20%

## **Modules of Warehouse Management Suite (WMS):**

### **Stock Counting:**

Enhances inventory management efficiency. Provides accurate counts for the entire warehouse.

Key Features:

- Conducts precise physical counts
- Identifies discrepancies in inventory
- Generates insightful reports for data-driven decision-making

Benefits:

- Improves inventory control effectiveness
- Streamlines warehouse counting operations
- Facilitates better decision-making through accurate data

### **Stock Transfer:**

Module for inventory transfers between locations.

Key Features:

- Creating and managing transfer documents
- Access to ongoing and completed transfers

Benefits:

- Efficient tracking through processes
- Seamless experience

### **Goods Receipt PO:**

Streamlines supplier communication and incoming inventory management.

Key Features:

- Overview of open purchase orders
- Detailed item tracking
- Efficient processing and scanning of order items

Benefits:

- Tracking and management of purchase orders
- Comprehensive overview of orders and items

### **Goods Return:**

Simplifies return of items to stock, enhances efficiency in return processes.

Key Features:

- Accurate inventory management of returns
- Creation of return documents with specified reasons
- Seamless initiation of returns

Benefits:

- Effective tracking and processing of returned items

### **Pick:**

Streamlines warehouse picking transactions.

Key Features:

- Efficient order selection
- Generating precise pick lists
- Accurate order fulfillment
- Pick for Production
- Transfer for Production

Benefits:

- Optimizes workflows
- Inventory tracking
- Improves customer satisfaction

## **Sales Return:**

Streamlines efficient product returns and refunds to customers.

Key Features:

- Precise inventory adjustments
- Processing of sales return documents

Benefits:

- Optimizes sales workflows
- Enhances inventory accuracy
- Improves customer satisfaction

## **Warehouse Check:**

Comprehensive overview of BIN locations and related items in the warehouse.

Key Features:

- Allows scanning or manual entry to get detailed item and BIN location information
- Real-time quantity tracking

Benefits:

- Efficient and accurate warehouse tracking
- Easy access to item information

## **Item Check:**

Comprehensive overview of item information.

Key Features:

- Allows scanning or manual entry to get detailed item information
- Real-time quantity tracking

Benefits:

- Efficient and accurate warehouse tracking
- Easy access to item information

## **Inventory GR:**

Module for efficient movement of products out of storage.

Key Features:

- Recording and creating of stock issue documents
- Real-time visibility and control over inventory levels
- Executes issue processes
- Reflects reductions in stock quantity

Benefits:

- Optimized outbound warehouse operations
- Tracks withdrawals from storage and reasons why

## **Stock Goods Issue:**

Managing and recording stock reductions when goods are issued or withdrawn from storage.

Key Features:

- Reduce inventory quantities when issuing goods

- Create, manage, and document goods issue transactions
- Integrate seamlessly with SAP modules (Sales, Materials, Production)
- Track goods by batch or serial numbers
- Support for multiple units of measure (UoM)
- Ensure only authorized personnel can approve transactions

Benefits:

- Maintain accurate stock levels to avoid stockouts or overstocking
- Enable data-driven inventory decisions
- Ensure data security and compliance

## **Issue for Production:**

Allows users to manually issue material from inventory to production directly where they are physically handled.

Key Features:

- Scan bin location and items for automatic data entry
- Batch/serial number prompts for relevant items
- Internal verification of quantity before submission
- One-click 'Save on SAP B1' to process the stock issue

Benefits:

- Streamlines production stock issues
- Keeps updated stock levels

## **Receipt from Production:**

Processes finished goods into inventory after production.

Key Features:

- Supports single and multiple production orders in one receipt
- Scanning of batch/serial numbers and handling of UoM items
- Ability to process receipts for more than planned quantities

Benefits:

- Record finished goods into inventory, ensuring accurate tracking

## **Delivery:**

Streamlines order fulfillment and shipment management. Eliminates unnecessary steps, boosting efficiency.

Key Features:

- Generate delivery documents from sales-related records
- Create deliveries without a base document
- Bypass pick documents when applicable

Benefits:

- Faster fulfillment: Reduces steps in order processing
- Improved efficiency: Optimizes inventory movement

## **Pain Points and problems Solved by WMS**

- No Real-Time Visibility
- High Human Error rate
- Manual work taking too long
- Inaccurate Inventory data
- Unoptimized workforce
- Slow software

# Product 2: Automation Service

## What are benefits of choosing Logiks Solutions Automation Service and why should you choose it?

- Ready on the go - Intuitive and easy-to-use interface, no comprehensive training needed
- Quick and Seamless Integration - Developed as an add-on to be easily integrated with SAP Business One
- First 3 Scenarios are Free - First 3 Automation scenarios are free, pay once you need more
- Cloud-Based Management - Centralized cloud management ensures versatility and accessibility
- Lightning Fast - No time wasted on long and repetitive tasks
- Retaining skilled workers - Automating repetitive tasks leaves more time for tasks that matter

### Automation Service Modules:

- Document Templates
- Print Job Automation
- Serial & Batch Number Creation
- Stock Transfer Job Automation

### Document Templates:

Cloud-based centralized library to manage all document templates

- Automatic download via gateway
- Self-check for updates

### Print Job Automation:

Fastens business processes with automatic printing

- Define conditions, parameters, triggers for automated execution
- Eliminate manual print job processing interruptions
- Example: auto-print delivery notes on chosen printer

### Serial & Batch Number Creation:

Simplifies processes and documentation

- Automated generation of serial and batch numbers
- Enhances efficiency and accuracy

### Stock Transfer Job Automation:

Automate stock movement in warehouse

- Automatic movement between warehouses after receipt
- Avoid customization of SAP Business One

## End-to-End Digitalization Consulting

Save up to 50% Time and Money with our Digitalization Consulting for your Supply Chain

With our End-to-End Digitalization Consulting, we are not only serving our software but providing a holistic solution.

What problems are solved:

Problems:

- Time-consuming manual tasks when qualified people are hard to find
- Demotivating, repetitive tasks
- Paperwork lacking accuracy and real-time data
- Scaling processes not possible due to manual dependency

Solutions:

- Manual tasks run automatically
- Staff focus on important topics, processes run with minimal HR involvement
- Real-time process control and reporting
- Fast, easy, scalable processes with high digitalization and documentation

## **Steps of consulting process:**

### **Step 1: Requirement Analysis**

Includes detailed summary of current environment and process parameters. Takes 1-2 weeks.

### **Step 2: Conceptual Design**

Workshops to craft future processes and refine concept. Takes 2-4 weeks.

### **Step 3: Testing - Proof of Concept**

Implement PoC in environment for rigorous testing. Takes 1-2 weeks.

### **Step 4: Implementation**

Roll out to production environment and configure additional hardware if necessary. Takes 2-4 weeks.

### **Step 5: Hypercare & Post Go Live Support**

Provide intensive support during and after go-live. Takes 1-2 weeks.

## **What happens next?**

- You schedule an initial discovery call with us
- Together we determine if a cooperation works for both parties
- We kick off your consulting project with our Solution Consulting Team

## **Frequently Asked Questions - FAQ**

### **Q: In which regions are Logiks Solutions' services available?**

A: Our services are available worldwide, as we collaborate with partners around the globe. There are no geographical restrictions.

### **Q: What industries does Logiks Solutions serve?**

A: We specialize in providing end-to-end digitalization solutions for the entire supply chain.

## **Q: How can I become a partner with Logiks Solutions?**

A: Simply leave your contact information on our website via the Contact Us page: <https://www.logiks.solutions/contact/> Or talk to us through live chat, and our team will reach out shortly.

## **Q: What does partnership with Logiks Solutions look like?**

A: Logiks Solutions takes a partner-centric approach, offering solutions designed to benefit our partners' clients. We provide a competitive margin system and ensure our partners have a voice in shaping future development.

## **Q: What type of support does Logiks Solutions offer during and after implementation?**

A: We equip partners to provide high-quality service to their clients and offer direct consulting services for unique needs.

## **Q: Where can I find the documentation for the feature descriptions of Logiks Solutions?**

A: You can find in-depth feature descriptions in the Logiks Knowledge Base: <https://kb.logiks.solutions>
